APPLICATION FOR CONSTRUCTION PERMIT

The following engineering statement and attached exhibits have been prepared for The Radio Board of the Victory Christian Center Assembly of God, Inc. and are in support of their application for a new FM broadcast station to serve Seelyville, Indiana.

The proposed facility would operate with a maximum effective radiated power of 6.0 KW. and with the center of radiation at 100 meters above average terrain. The facility would operate on channel 240 as a Class A station. This allocation has recently been made to Seelyville as the result of MM Docket No. 89-613. The window for applications for this allocation closes on December 14, 1990.

A complete analysis has been performed which demonstrates that the proposed site would be short-spaced to WPZZ at Franklin, Indiana. This short-spacing results from the intent by the applicant to operate with 6.0 KW. effective radiated power. When the original Petition for Rulemaking was filed, the maximum power for Class A facilities was 3.0 KW. At that power level, the proposed site meets all spacing criteria.

Since the facility would be short-spaced WPZZ when operating at the 6.0 KW. maximum power, a directional antenna

has been proposed to eliminate any possible interference to or from that station. The information required in accordance with Section 73.215 of the Commission's Rules and Regulations is attached.

The proposed facility will operate by remote control from the main studios which will be located in the community of Seelyville. Auxiliary power generating equipment will be installed at the transmitter site to ensure that the facility will be able to remain on-the-air during periods of national emergency or severe weather.

Section V-B - FM BROADCAST ENGINEERING DATA	FOR COMMISSION USE ONLY File No. _____ ASB Referral Date _____ Referred by _____

Name of Applicant

The Radio Board of the Victory Christian Center Assembly of God, Inc.

Call letters *(if issued)*	Is this application being filed in response to a window? [X] Yes [ ] No If Yes, specify closing date: December 14, 1990

Purpose of Application: *(check appropriate box(es))*

- [X] Construct a new (main) facility
- [ ] Construct a new auxiliary facility
- [ ] Modify existing construction permit for main facility
- [ ] Modify existing construction permit for auxiliary facility
- [ ] Modify licensed main facility
- [ ] Modify licensed auxiliary facility

If purpose is to modify, indicate below the nature of change(s) and specify the file number(s) of the authorizations affected.

- [ ] Antenna supporting-structure height
- [ ] Effective radiated power
- [ ] Antenna height above average terrain
- [ ] Frequency
- [ ] Antenna location
- [ ] Class
- [ ] Main Studio location
- [ ] Other *(Summarize briefly)*

File Number(s) _____

1. Allocation:

Channel No.	Principal community to be served:		
	City	County	State
240	Seelyville	Vigo	IN

Class *(check only one box below)*

[X] A [ ] B1 [ ] B [ ] C3
[ ] C2 [ ] C1 [ ] C

2. Exact location of antenna.

(a) Specify address, city, county and state. If no address, specify distance and bearing relative to the nearest town or landmark. 0.2 km. W. of 9 North Rd., 1.6 km. N. of U.S. Hwy. 40; Seelyville, Vigo County, Indiana

(b) Geographical coordinates (to nearest second). If mounted on element of an AM array, specify coordinates of center of array. Otherwise, specify tower location. Specify South Latitude or East Longitude where applicable; otherwise, North Latitude or West Longitude will be presumed.

Latitude	°	'	"	Longitude	°	'	"
	39	30	10		87	19	01

3. Is the supporting structure the same as that of another station(s) or proposed in another pending application(s)? [ ] Yes [X] No

If Yes, give call letter(s) or file number(s) or both. DNA

If proposal involves a change in height of an existing structure, specify existing height above ground level including antenna, all other appurtenances, and lighting, if any.

DNA

4. Does the application propose to correct previous site coordinates? ☐ Yes ☒ No
If Yes, list old coordinates.

Latitude ° ' "	Longitude ° ' "

5. Has the FAA been notified of the proposed construction? ☒ Yes ☐ No
If Yes, give date and office where notice was filed and attach as an Exhibit a copy of FAA determination, if available.

Exhibit No. DNA

Date Dec. 3, 1990 Office where filed Great Lakes Region

6. List all landing areas within 8 km of antenna site. Specify distance and bearing from structure to nearest point of the nearest runway.

	Landing Area	Distance (km)	Bearing (degrees True)
(a)	Hulman	5.5 km.	175°
(b)			

7. (a) Elevation: *(to the nearest meter)*

(1) of site above mean sea level: 174 meters

(2) of the top of supporting structure above ground (including antenna, all other appurtenances, and lighting, if any); and 100 meters

(3) of the top of supporting structure above mean sea level [(a)(1) + (a)(2)] 273 meters

(b) Height of radiation center: *(to the nearest meter)* H - Horizontal; V - Vertical

(1) above ground 93 meters (H)

93 meters (V)

(2) above mean sea level [(a)(1) + (b)(1)] 267 meters (H)

267 meters (V)

(3) above average terrain 100 meters (H)

100 meters (V)

8. Attach as an Exhibit sketch(es) of the supporting structure, labelling all elevations required in Question 7 above, except item 7(b)(3). If mounted on an AM directional-array element, specify heights and orientations of all array towers, as well as location of FM radiator.

Exhibit No. E-1

9. Effective Radiated Power:
(a) ERP in the horizontal plane 6 kw (H*) 6 kw (V*)

(b) Is beam tilt proposed? ☐ Yes ☒ No

If Yes, specify maximum ERP in the plane of the tilted beam, and attach as an Exhibit a vertical elevational plot of radiated field.

Exhibit No. DNA

DNA kw (H*) DNA kw (V*)

*Polarization

10. Is a directional antenna proposed? [X] Yes [ ] No

If Yes, attach as an Exhibit a statement with all data specified in 47 C.F.R. Section 73.316, including plot(s) and tabulations of the relative field. Exhibit No. E-2

11. Will the proposed facility satisfy the requirements of 47 C.F.R. Sections 73.315(a) and (b)? [X] Yes [ ] No

If No, attach as an Exhibit a request for waiver and justification therefor, including amounts and percentages of population and area that will not receive 3.16 mV/m service. Exhibit No. DNA

12. Will the main studio be within the protected 3.16 mV/m field strength contour of this proposal? [X] Yes [ ] No

If No, attach as an Exhibit justification pursuant to 47 C.F.R. Section 73.1125. Exhibit No. DNA

13. (a) Does the proposed facility satisfy the requirements of 47 C.F.R. Section 73.207? [ ] Yes [X] No

(b) If the answer to (a) is No, does 47 C.F.R. Section 73.213 apply? [ ] Yes [X] No

(c) If the answer to (b) is Yes, attach as an Exhibit a justification, including a summary of previous waivers. Exhibit No. DNA

(d) If the answer to (a) is No and the answer to (b) is No, attach as an Exhibit a statement describing the short spacing(s) and how it or they arose. Exhibit No. E-3

(e) If authorization pursuant to 47 C.F.R. Section 73.215 is requested, attach as an Exhibit a complete engineering study to establish the lack of prohibited overlap of contours involving affected stations. The engineering study must include the following: Exhibit No. E-3

(1) Protected and interfering contours, in all directions (360°), for the proposed operation.
(2) Protected and interfering contours, over pertinent arcs, of all short-spaced assignments, applications and allotments, including a plot showing each transmitter location, with identifying call letters or file numbers, and indication of whether facility is operating or proposed. For vacant allotments, use the reference coordinates as the transmitter location.
(3) When necessary to show more detail, an additional allocation study utilizing a map with a larger scale to clearly show prohibited overlap will not occur.
(4) A scale of kilometers and properly labeled longitude and latitude lines, shown across the entire exhibit(s). Sufficient lines should be shown so that the location of the sites may be verified.
(5) The official title(s) of the map(s) used in the exhibits(s).

14. Are there: (a) within 60 meters of the proposed antenna, any proposed or authorized FM or TV transmitters, or any nonbroadcast *(except citizens band or amateur)* radio stations; or (b) within the blanketing contour, any established commercial or government receiving stations, cable head-end facilities, or populated areas; or (c) within ten (10) kilometers of the proposed antenna, any proposed or authorized FM or TV transmitters which may produce receiver-induced intermodulation interference? [ ] Yes [X] No

If Yes, attach as an Exhibit a description of any expected, undesired effects of operations and remedial steps to be pursued if necessary, and a statement accepting full responsibility for the elimination of any objectionable interference (including that caused by receiver-induced or other types of modulation) to facilities in existence or authorized or to radio receivers in use prior to grant of this application. *(See 47 C.F.R. Sections 73.315(b), 73.316(e) and 73.318.)* Exhibit No. DNA

15. Attach as an Exhibit a 7.5 minute series U.S. Geological Survey topographic quadrangle map that shows clearly, legibly, and accurately, the location of the proposed transmitting antenna. This map must comply with the requirements set forth in Instruction V. The map must further clearly and legibly display the original printed contour lines and data as well as latitude and longitude markings, and must bear a scale of distance in kilometers.

Exhibit No. E-4

16. Attach as an Exhibit *(name the source)* a map which shows clearly, legibly, and accurately, and with the original printed latitude and longitude markings and a scale of distance in kilometers:

Exhibit No. E-5

(a) the proposed transmitter location, and the radials along which profile graphs have been prepared;

(b) the 3.16 mV/m and 1 mV/m predicted contours; and

(c) the legal boundaries of the principal community to be served.

17. Specify area in square kilometers (1 sq. mi. = 2.59 sq. km.) and population (latest census) within the predicted 1 mV/m contour.

Area 2464.5 sq. km. Population 153,296

18. For an application involving an auxiliary facility only, attach as an Exhibit a map *(Sectional Aeronautical Chart or equivalent)* that shows clearly, legibly, and accurately, and with latitude and longitude markings and a scale of distance in kilometers:

Exhibit No. DNA

(a) the proposed auxiliary 1 mV/m contour; and

(b) the 1 mV/m contour of the licensed main facility for which the applied-for facility will be auxiliary. Also specify the file number of the license.

19. Terrain and coverage data *(to be calculated in accordance with 47 C.F.R. Section 73.313)*

Source of terrain data: *(check only one box below)*

☒ Linearly interpolated 30-second database ☐ 7.5 minute topographic map

(Source: NGDC)

☐ Other *(briefly summarize)*

Radial bearing (degrees True)	Height of radiation center above average elevation of radial from 3 to 16 km (meters)	Predicted Distances	
		To the 3.16 mV/m contour (kilometers)	To the 1 mV/m contour (kilometers)
*100°	83.8	12.6	22.5
0	99.1	16.1	28.4
45	93.2	15.5	27.5

315	110.4	17.0	29.7

*Radial through principal community, if not one of the major radials. This radial should NOT be included in the calculation of HAAT.

20. Environmental Statement *(See 47 C.F.R. Section 1.1301 et seq.)*

Would a Commission grant of this application come within Section 1.1307 of the FCC Rules, such that it may have a significant environmental impact? ☐ Yes ☒ No

If you answer Yes, submit as an Exhibit an Environmental Assessment required by Section 1.1311. Exhibit No. DNA

If No, explain briefly why not. The proposed facility complies fully with the requirements of §1.1306 and §1.1307 as modified by General Docket No. 79-163.

CERTIFICATION

I certify that I have prepared this Section of this application on behalf of the applicant, and that after such preparation, I have examined the foregoing and found it to be accurate and true to the best of my knowledge and belief.

EXHIBIT E-2

DIRECTIONAL ANTENNA DATA

The proposed facility will operate with a directional antenna. The attached data contains the information required in Section 73.316 of the Commission's Rules and Regulations. In particular, the attached data contains a tabulation of the relative field of the proposed antenna system. A horizontal plane plot of the antenna pattern and a vertical plane plot of the antenna pattern.

It is noted that only one vertical plane plot is attached. It is respectfully submitted that the pattern in the vertical plane will be essentially the same at all values of azimuth.

It is respectfully submitted that the horizontal pattern contained in this exhibit demonstrates the limits on the proposed radiation. When the actual antenna is constructed, the pattern will be adjusted to be as close as possible to this pattern without exceeding any of the limits. The maximum effective radiated power at any azimuth will not exceed 6.0 KW. and will be further limited as shown on the pattern plot. The measured pattern for the antenna actually installed will be submitted to the Commission with the license application.

The maximum to minimum ratio for the proposed antenna is well below the 15 dB specified by the Commission. In addition, the rate of change does not exceed 2 dB per decade in accordance with the Commission's Rules and Regulations. The relationship between the vertically polarized and horizontally polarized components will be in accordance with the Commission's Rules and Regulations.

EXHIBIT E-3

ALLOCATION STUDY

The proposed facility would be short-spaced to Radio Station WPZZ at Franklin, Indiana. This short-spacing results from the intent of the applicant to seek 6.0 KW. station as opposed to a 3.0 KW. station. The spacing criteria is met for a 3.0 KW. station which was foreseen at the time of the filing of the original Petition for Rulemaking. The regulations now permit 6.0 KW. with adequate contour protection. That protection will be provided as shown on the attached exhibits.

No other station is short-spaced to the proposed facility other than WPZZ. Radio Station WPZZ has been protected as though it operated with a full 6.0 KW. with its center of radiation at 100 meters above average terrain. In reality, WPZZ is limited to well below those values. WPZZ is currently short-spaced to WFMS at Indianapolis. This short-spacing is extremely severe with an actual separation of 29.2 kilometers while the required distance is 69 kilometers. However, in accordance with the Commission's Rules and Regulations, the protection to WPZZ assumes that they are operating with maximum possible Class A facilities.

Re: Amendment to FM Application
Seelyville, Indiana
File No. BPH-901217MJ

Dear Ms. Searcy:

Transmitted herewith, in triplicate, on behalf of The Radio Ministries Board of Victory Christian Center Assembly of God, Inc., is an amendment to its above-referenced application for a new FM broadcast station at Seelyville, Indiana. Since this amendment is being filed within 30 days after public notice of the acceptance for tender of the Seelyville application, it is being filed as a matter of right pursuant to §73.3522(a)(6) of the rules.

Should there be any questions concerning this matter, please contact this office directly.

Very truly yours,

Cheryl A. Kenny

AMENDMENT

The Radio Ministries Board of Victory Christian Center Assembly of God, Inc. hereby amends its above-referenced application for a new FM broadcast station at Seelyville, Indiana as follows:

A. Substitute the attached pages 3(A) and 3(B), concerning parties to the application, for the corresponding pages currently on file.

B. Substitute the attached page 4 for the corresponding page currently on file.

C. Substitute the attached Exhibits numbers 1 and 3 for the corresponding Exhibits 1 and 3 currently on file.

D. Add the attached Exhibit 1-A.

E. Add the attached engineering statement.

Executed this 25th day of March, 1991.
